

INDEX

ALDROVANDI R. and PEREIRA J. G.: Existence of Lagrangians for the Yang-Mills equations 237-243
ASANOV G. S.: Finslerian fibered extension of gauge field theory: Lie-invariance in fibres and effective Lagrangian 367-399
ASANOV G. S. and KISELEV M. V.: Comparing the Finslerian gauge approach with the $SU(3) \times SU(2) \times U(1)$ -model 401-411
BATES L.: Symmetry preserving deformations of the Kepler problem 413-428
BINZ E.: Isometric Euclidean embeddings of a compact manifold form a Fréchet manifold 157-167
DELL'ANTONIO A. F.: Non-linear electrostatics in inhomogeneous media 169-189
FORTE B. and HUGHES W.: The maximum entropy principle: a tool to define new entropies 227-235
FRIEDRICH J. and KLOTZ L.: On extensions of positive definite operator-valued functions 45-65
JANECZKO S. and KOWALCZYK A.: Stability criteria and classification of singularities for equivariant Lagrangian submanifolds 17-44
KAZIMIERCZYK P.: On the stochastic inverse problem for the heat conduction equation 245-259
KOSYAK A. V.: Extension of unitary representations of inductive limits of finite dimensional Lie groups 285-302
KOZITSKY Yu. V.: Hierarchical model of a vector ferromagnet. Self-similar block-spin distributions and the Lee-Yang theorem 429-445
KWAŚNIEWSKI A. K.: Algebraic properties of the 3-state Potts model 191-195
KWAŚNIEWSKI A. K.: On maximally graded algebras and Walsh functions 137-142
MARINI V. and PRÄSTÅRÖ A.: On the conservation laws of PDEs 211-225
NEIDHARDT H.: On the orthogonal dissipative Lax-Phillips scattering theory 121-136
NIZHNIK L. P.: The inverse scattering problems for the hyperbolic equations and their application to non-linear integrable systems 261-283
PARCZYK K. and MASŁOWSKI T.: Thermodynamic limit and central limit theorem for point random fields in non-ergodic case 1-15
PULMANNOVA S.: Joint distributions of observables on spectral logics 67-71
ROY SISIR: Probabilistic Finsler geometry and the 4π -periodicity factor of a spinor wave function 361-366
RUSKAI M. B.: Extremal properties of relative entropy in quantum statistical mechanics 143-150
RZEWUSKI J. I.: Quantization as group extension 335-359
SCHROEK F. E.: Quantum fields for reproducing kernel Hilbert spaces 197-209
SCHRÖTER J.: An axiomatic basis of space-time theory. Part I: Construction of a causal space with coordinates 303-333
SLAWIANOWSKI J. J.: Affinely rigid body and Hamiltonian systems on $GL(n, \mathbb{R})$ 73-119
BOOK REVIEWS
HESTENES D.: New Foundations for Classical Mechanics (ref. B. Jancewicz) 151-154
VARADARAJAN V. S.: Geometry of Quantum Theory (ref. W. Daniel) 154-156
